PREAMBLE TO BILL OF QUANTITIES

1. These bills of quantities shall form part of the contract documents and are to be read in conjunction with the instruction to bidders general, special conditions of contract, technical specifications, technical drawings and other contract documents.

2. There is no guarantee to the contractor that he will be required to carry out the quantities of work indicated under any particular item or group of items in the bills of quantities, though on the contract as a whole the quantities are believed to represent the overall value of the work to be carried out.

3. The prices and rates inserted in the bills of quantities will be used for valuing the work executed and the engineer will measure the whole of the works in accordance with the contract.

4. The quantities in the bill of quantities are estimated and provisional, and are given to provide a common basis for bidding. The basis of payment will be the actual quantities of work ordered and carried out, as measured by the contractor and verified by the engineer and valued at the rates and prices bid in the priced bill of quantities, where applicable, and otherwise at such rates as the engineer may fix within the terms of the contract.

5. The rates in the bill of quantities shall include all contractual plant, labour, supervision, materials erection, maintenance, insurance, profit, taxes and duties, together with all general risks liabilities, and obligations set out or implied in the contract.

6. A rate or price shall be entered against each item in the priced bill of quantities whether quantities are stated or not. The cost of items which the contractor as failed to enter a rate or price shall be deemed to be covered by the other rates and prices entered in the bill of quantities.

7. The whole cost of complying with the provisions of the contract shall be included in the items provided in the bill of quantities, and where items are not provided, the cost shall be deemed to be distributed among the rates and prices entered in the related items of work.

8. Provisional sums included and so designated in the bill of quantities shall be expended in whole or in part at the direction and discretion of the engineer.

9. The method of measurement of completed work for payment shall be in accordance with the standard method of measurement of civil works.

10. For any arithmetic errors in computation or summation corrected by the employer it shall be deemed as follows;

   (a) Where the discrepancy is between amounts in figures and in words, the amount in words will govern; and

   (b) Where there is a discrepancy between the unit rate and the total amount derived from the multiplication of the unit price and the quantity the unit rate as quoted will govern, unless in the opinion of the employer there is an obviously gross misplacement of a decimal point in the unit price, in which event the total amount as quoted will govern, and the unit rate will be corrected.
